

MANHATTAN
COLLEGE

MASTER OF SCIENCE IN HEALTHCARE INFORMATICS

ADVANCE THE FUTURE OF HEALTHCARE

ANSWERING THE CALL FOR HEALTHCARE INFORMATICS

Healthcare is experiencing a growing gap between the amount of data collected and the patient. The healthcare industry has been calling for a solution to this problem with more advanced, innovative, and data-driven professionals. Manhattan College has answered that call by creating our Master of Science in Healthcare Informatics.

With the power of data in your hands, you can use the most advanced technology in the industry and help deliver the best patient care. Through the M.S. in Healthcare Informatics program, you'll learn essentials of the industry, including how to:

- Manage online portal systems
- Decipher electronic medical records
- Navigate evolving healthcare legislation
- Facilitate data collection devices and software
- Understand and communicate sensitive medical diagnoses and information
- Onboard a range of new and changing medical technology

THE DEADLINE TO APPLY
FOR FALL 2023 IS **SEPTEMBER 1**

Classes begin October 16!

ADMISSION REQUIREMENTS

The Master of Science in Healthcare Informatics is geared toward driven, motivated individuals looking to advance the future of healthcare. To be considered for this competitive program, applicants should have:

- A bachelor's degree from an accredited college or institution.
- An undergraduate GPA of 3.00 on a 4.00 scale, although other factors may be considered in the decision for admission.
- Suitable preparation in the behavioral sciences. Consideration will be given for teaching experience and other applicable experience.
- Other factors, such as years of professional experience, a high GPA average in your major field, or academic development beyond the baccalaureate degree.

APPLICATION REQUIREMENTS

- Online Application
- College transcript(s)
- Written statement of interest in the program
- Resume
- At least one letter of reference, preferably from a professional colleague or professor.
